

December Newsletter

We have had a busy start to the month. Currently, your student is preparing for the Algebra 1A midterm. This will assess everything from chapters 1 through 7. We have been preparing for this since last week. This week there are extra seminar classes to help us prepare. Last Friday we used the indicators to identify the areas that needed some re-teaching. Monday and Wednesday are devoted to practice and review of chapters 1-4 and 5-7, respectively. The midterm exam is on Monday, December 21 from 9 – 11 am in the cafeteria. (There are a few students with conflicts – we have dealt with those on an individual basis.)

Have an enjoyable and restful break!
