

Westford School District – 2008-2009 SALARY SCHEDULE

The salary schedule below should be used for general informational purposes only and should NOT be interpreted as a guarantee of step or column placement if hired. The District reserves the right to use other factors to determine proper salary schedule placement. Salary Schedule placements are subject to caps. Salary Schedule placements are also subject to limitations of the applicable master agreement.

STEP PLACEMENT

To estimate your step placement on our salary schedule grant yourself one step advancement for each of the first five years you taught as a licensed educator in a public school (preK-12) starting at step 3. Beyond five years of experience, grant yourself one additional step advancement for every two years you taught as a licensed educator in a public school (preK-12). Your estimated step placement would be one step above your calculated step advancements. (Examples: If you have four years of previous public school teaching experience (preK-12) you should estimate a step seven placement. If you have 11 years of previous public school teaching experience (preK-12) you should estimate a step eleven placement. Etc.)

COLUMN PLACEMENT

To estimate your column placement on our salary schedule you should only consider academic credits that are earned subsequent to the earning of a degree, are related to the teaching assignment, and which a grade of B or better was obtained. Seminars, conferences, workshops, and other non-credit bearing courses shall not be considered. If hired, photocopies of official transcripts and/or grade reports would need to be provided to verify proper column placement.
