

Google Earth and Google Maps Online Tutorials

[Google Maps User's Guide](#)

The screenshot shows a browser window with the URL <http://maps.google.com/help/maps/Userguide/>. The page title is "Google maps" and the main heading is "How to Create a Map". Below this, there is a list of links for various map creation tasks, such as "Creating a Map", "Finding Your Maps", and "Adding and Editing Placemarks". A small inset image shows a map of Central Park with a photo of a city skyline overlaid. The page also includes a section titled "Your maps can contain the following:" with a bulleted list of "Placemarks", "Lines", and "Shapes".

[Google Earth User's Guide](#)

The screenshot shows the "Google earth" logo and the heading "Google Earth User Guide". Below the logo is a search box with the text "Search Google Earth User Guide" and a "Search" button. To the right, there is a section titled "Table of Contents" with a sub-heading "Introduction". Under "Introduction", there is a bulleted list of links: "Getting to Know Google Earth", "Five Cool, Easy Things You Can Do in Google Earth", "New Features in Version 4.3", "Installing Google Earth", "System Requirements", "Changing Languages", "Additional Support", "Selecting a Server", "Deactivating Google Earth Plus, Pro or EC", "Adding Content", and "Navigating in Google Earth".

Final Curve

When you turn the corner/ And you run into yourself/ Then you know that you have turned/ All the corners that are left. -Langston Hughes

[21st Century Cartography](#)

Google Earth and Google Maps

When I think about technology...

-fundament literacy, understanding place in Geography is more important now than ten-fifteen years ago
-added value, the question is why are students still coloring map when the technology exists

- Framed within a proper pedagogy, have to give students fifteen minutes to play (gets it out of the way)

-How do we know it works?, How does the technology extend the learning?

Podcast202: 21st Century Cartography by David Jakes

posted in [geography](#), [podcasts](#), [web 2.0](#) |

This podcast features a recording of David Jakes' excellent presentation about Google Maps and Google Earth at TechForum Southwest in Austin, Texas, on November 2, 2007. Every subject can be studied within a geographical context. Two freely available tools, Google Earth and Google Maps can be used by teachers and students to create rich learning environments that merge content, media, and geography to make learning truly engaging. These two tools are rapidly evolving, with a rich online community supporting the application of these two tools to teaching and learning.
